

# DNE, DNF, IN model Quick Start Guide (con't) Building Programs

## Building a program

\*See "Program Creation" section of instruction manual, for more information

Note: Quick start guide assumes all program parameters will be set. To skip over any parameter, continue pressing **PROGRAM** until desired programming step is displayed.

Press **CANCEL** at any time to return to previous setting parameter or menu.

For all other settings under MODE or FUNCTION key, please refer to the standard instruction manual.
